

Line XVR 16 multi-format video recorder

[Line XVR 16](#) is **ULTRA HD multi-format video recorder** is intended for simultaneous operation with cameras of formats TVI, AHD, CVI, CVBS and IP. You can connect up to 16 cameras (Line license is included).

The key feature of the Line XVR is **individual real-time adjustment** of each channel.

Analog, TVI, AHD, CVI cameras are supported with the resolution **up to 8 MP**, and [4190 models of IP cameras of 136 famous brands](#) (resolution is unlimited, only the total bit rate per device is 64 MB/s).

A place has been provided inside the case to install two 3.5" hard drives, with a total capacity of **up to 24 terabytes**.

Line XVR may be used for **local surveillance and playback**. Opening cameras to full-screen mode, switching surveillance/playback is made by USB mouse.

The system is managed remotely, from any **Line client on PCs** running under Windows x86-x64: XP, Vista, 7, 8, 10, Server 2003-2012. All features of the Line video surveillance system are included.

To implement video surveillance points, one can use the following:

- a monitor connected to the device;
- mobile phones and tablets running [Android and iOS](#);
- browsers with Flash support;
- office and home PC running Windows x86-x64: XP, Vista, 7, 8, 10, Server 2003-2012.

The number of remote workstations is not limited by the software.

Simultaneous operation of various types of cameras does not require pre-setting templates, Line XVR will automatically detect analog signal, and choose the optimum operation mode. For more detailed configuring and connecting IP cameras, a client workstation of the Line software may be used.

New settings are applied without rebooting the device.

The local monitor displays cameras with the resolution of ≤ 5 megapixels.
